Gilgamesh

Decentralized Knowledge-based Social Platform Powered by Blockchain Technologies

Gilgamesh Platform empowers readers, critics, and authors to socially connect and exchange knowledge through a cohesive and engaging user experience, and consume GIL Tokens using Ethereum blockchain technology.

The Problem

Books have been our main source of knowledge for thousands of years. However, with the advent of new technologies and the internet, there is no simple, meaningful, and productive platform that encourages book readers and authors to connect, engage, and gain knowledge.
Instead, the market is full of stagnant and outdated platforms that no longer satisfy the demands of the book community.
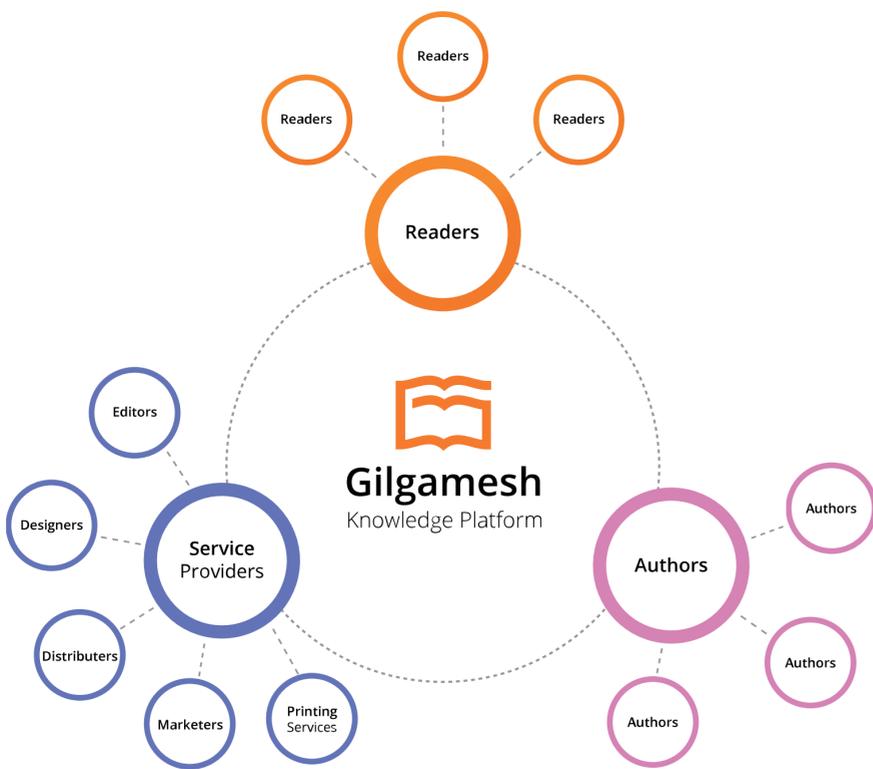

Authors and readers are not connected
Readers can't socialize and share knowledge with other readers
Authors don't get real-time feedback and reviews of their books

The Gilgamesh Platform Solution

The Gilgamesh platform provides a unique, simple user experience that encourages readers to engage and connect with one another, consume more informative content, and gain knowledge.

The platform is an open market for users to socialize; find, buy, review, and discuss books; and directly influence the publishing industry. Authors will be able to publish their work through service providers and receive the full financial benefit of their sales on the platform, which will bring new authors into the market and influence the way people consume books.

Readers, critics, and authors can connect socially
The platform revitalizes the book industry and creates a friendly and fun for the book community
Gilgamesh removes the publisher as middleman; authors can purchase services from self-publishing service providers on the platform
Authors and service providers earn a fair, living wage for their sales and services
Users create their own opportunities for success and become happier, more intelligent people

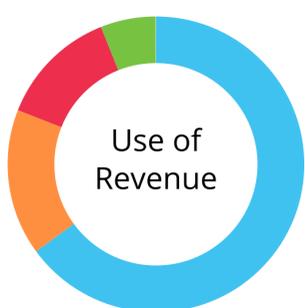

GIL Token Sale Terms and Conditions

The Gilgamesh platform will introduce a standard ERC20 token - GIL token is based on the Ethereum smart contract that incentivizes participation on the platform.

GIL token is a utility token meant to be used on Gilgamesh Platform. Specifically, it rewards users for meaningful engagements that help grow the platform, such as writing a book review, and can only be purchased from the Gilgamesh platform during the token sale.

60 Million GIL Tokens will be available for sale during the actual crowdfunding.

Use of Revenue

- **65%** Employees
- **16%** Operations
- **13%** Marketing
- **6%** Legal

GIL Token Allocations

- **30%** Gilgamesh platform users
- **25%** Token Sale
- **20%** Retained by Gilgamesh
- **20%** Founding team
- **5%** Early contributors & Advisors
